## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### **Information Disclosure Statement**

2. The information disclosure statement filed reference listed in the information Disclosure Submitted on 07/03/03, 4/21/04 have been considered by the examiner (see attached PTO-1449).

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-10, are rejected under 35 U.S.C. 102(e) as being anticipated by Baker et al. (US Publication Number 2001/0055298 A1).

Regarding claims 1, 5, 7, 9, 10, Baker teaches a test method in a mobile terminal apparatus in a CDMA mobile communication system and test apparatus that is connected to the mobile terminal apparatus, comprising:

transmitting and receiving layer signal CDMA radio interface;  
signal transmitted implement radio connection over suspending transmission intermittently by apparatus (page 1 section 0003); and

Art Unit: 2686

function mobile terminal Carry test method in a mobile terminal apparatus CDMA mobile communication system and test apparatus that connected the mobile terminal apparatus, transmitting and receiving a measurement signal out radio transmission characteristic test (page 4 section 0060) comprising:

- setting CDMA radio interface (page 1 section 0003);

- setting conditions layers and transmit and receive measurement signal (page 5 sections 0065-0066);

- setting a condition carrying out loopback processing (page 5 section 0065);

- suspending transmission intermittently by RLC function signal transmitted the mobile terminal apparatus (page section 0060);

- carrying the test apparatus the radio transmission characteristic test on the mobile terminal apparatus (page 7 section 0087);

- releasing the loopback processing (page 6 section 0079); and

- releasing the CDMA radio interface (page 4 section 0060).

Regarding claims 2, 6, 8, Baker teaches the mobile terminal apparatus/test apparatus wherein according to an instruction from an external apparatus, the control section suspends transmission of the signal transmitted intermittently by RLC function (page 7 section 0087).

Regarding claim 3, Baker teaches a test apparatus according the control section controls the RLC function of the mobile terminal apparatus by wired connection via an external interface (page 4 sections 0060-0061, page 7 section 0087).

Art Unit: 2686

Regarding claim 4, Baker teaches a mobile terminal apparatus which connects to the test apparatus according claim and suspends radio claim wherein transmission of signal transmitted intermittently by RLC function in transmitting the measurement signal use carrying out the radio transmission characteristics test to the test apparatus (page 4 section 0060).

### **Conclusion**

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

**Zhang et al.** (US Publication 2002/0054578 A1) disclose channel and quality of service adaption for multimedia over wireless networks

**Meyer et al.** (US Publication 2004/025809 A1) disclose method and system for processing a data unit

**Numakura et al.** (US Publication 2005/0025188 A1) disclose wireless communication method and mobile terminal used therefor

**Any responses to this action should be mailed to:**

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Naghmeh Mehrpour whose telephone number is 571-272-7913.
